SOVAN

USER GUIDE — TRAINING MANUAL (ENGLISH)

SOVAN SOFTWARE

Production, Stocks, Billing, HR & Accounting

Flour mill / milling company

Stocks	Raw materials, Materials, Finished goods, Merchandise
Production	Plan → Requisition → Transfer → Production Order
Billing	Proforma → Sales Order → Invoice → Delivery Note (no invoice, no DN)
HR	Employee file + documents, leave, salary advances, payroll
Accounting	Chart of accounts, treasury, journals, depreciation, year-end close

Table of contents

1	Login and main menus
2	Stock organisation (RM, materials, FG, merchandise)
3	Master data
4	Procurement
5	Stock in / out, inventory and transfers
6	Production module
7	Billing process (proforma → invoice → delivery note)
8	Human Resources (file, documents, advances, payroll)
9	Accounting (treasury, journals, depreciation, year-end)
10	Approval workflow & reports
11	Best practices, exercises and evaluation

Objectives

Manage stocks and production; bill customers (proforma → invoice → delivery note); administer HR (complete file + attached documents, advances, payroll); master English double-entry accounting (treasury, journals, depreciation, balance sheet, year-end close).

Access rights

Visible menus depend on permissions. Contact the administrator if a menu is missing.

1 Login and menus

1. Enter your **email or username**.
2. Enter your **password**.
3. Click **LOGIN**.

Menu	Content
Basic files	Suppliers, Customers, Raw materials, Materials, Items (FG / merchandise)
Stock	Raw materials, Materials, Finished goods, Merchandise
Production	Plan, Requisition, Transfer, Production Order
Purchases	Request, Order, Receipt
Sales	Proforma, Sales orders, Invoices, Delivery notes, Credit notes
Employees / Leave / Payroll	HR: records, attached documents, leave, advances, payslips
Accounting	Chart of accounts, advances, fund transfers, cash outflow, journals, balance sheets

2 Stock organisation

Family	Stores	Examples
Raw materials (RM)	Main / Intermediate / Small	maize, wheat, grain, packaging (bags…)
Materials	Main / Intermediate / Small	machine parts, maintenance tools, PPE
Finished goods (FG)	FG stock + Small FG stock	flour (various pack sizes)
Merchandise	Merchandise stock	bought-for-resale items (if any)

3 Master data

1. Suppliers and Customers.
2. Categories and units of measure (RM / Materials).
3. Raw material and Material item cards.
4. **Items**: finished goods (with RM bill of materials) or merchandise.

> **Important**
> A finished good without linked raw materials cannot be manufactured correctly via the Production Order.

4 Procurement

Purchase request → **Purchase order** → **Receipt**

Menu **Purchases** (RM and Materials). Validate → Confirm → Approve. On receipt approval, stock increases.

> **SOVAN example**
> Purchase request for 20 t of maize → order → receipt into Main RM stock.

5 Stock in / out, inventory, transfers

Document	Purpose
Stock in / Stock out (RM, FG, Materials, Merchandise)	Movements outside the purchase / production / sales chain
Inventory	Adjust book stock to physical count
Requisition / Transfer (Materials)	Movement between material stores

6 Production module

Plan → **RM Requisition** → **RM Transfer** → **Production Order**

1. **Production plan**: FG and planned quantities → approval.
2. **RM requisition** then **Transfer** to the workshop.
3. **Production Order**: on approval, RM are consumed and FG enter FG stock.

SOVAN example
Plan 5 t of flour → grain requisition/transfer → approved Production Order → flour enters FG stock.

7 Billing process

Menu **Sales**. Factory commercial chain — **the invoice always comes before the delivery note**:

> **Mandatory rule**
> **No invoice, no delivery note.** The DN is issued only after the invoice (from the invoiced order). Never deliver without a prior invoice.

1. **Proforma invoice**: quotation / offer → Validate → Confirm → Approve.
2. **Sales order**: customer order confirmation.
3. **Invoice**: starts the real sale; print for the customer; settle cash or credit.
4. **Delivery note**: created **after** the invoice; authorises shipment of FG / merchandise; impacts stock on approval.

7.1 Cash or credit settlement

Mode	Procedure
Cash	Immediate collection on the invoice. Select the account: **cash or bank**.
Credit	Invoice on account. Customer needs a ledger account. Then DN to deliver. Follow-up under Credits / Recovery.

7 Billing — document rules

Rule	Detail
Original	First print of a voucher / invoice shows **Original**.
Copy	Reprint shows **Copy** + prior signatures + clear reason.
Signatures	Any voucher or invoice: **at least two signatures**; clear reason for cancel / correction.
Credit note	Menu **Credit Note** for error / return / correction.

7.2 Petty cash (if used)

1. Cashiers manage **petty cash** for daily cash collections.
2. End of day: transfer the total to **main cash** (Accounting › Fund Transfer).
3. Transfer voucher **signed** (2 signatures) and **filed**.

> **Errors**
> Document cancellation or Credit Note: always a clear reason + at least two signatures.

8 Human Resources

HR centralises organisation, the **complete employee file**, leave, salary advances and payroll.

Menu	Content
Employees	Companies, Departments, Services, Positions, Grades, Banks, employee records + **attached documents**
Leave	Leave types, Leave, Paid leave, attendance / timekeeping
Payroll	Salary advance, Pay journal, Payslips, Settings
Journals	Pay journal, Contribution journal, Tax journal (as configured)

8.1 Organisation & employee record

1. Set up **Company** → **Department** → **Service** → **Position / Grade** → **Banks**.
2. Create the employee: identity, staff number, assignment, basic salary, bank account, contacts.
3. Update the record on transfer, promotion or salary change.

> **Digital personnel file**
> Each employee has a system file: master data + attachments — so HR does not rely only on paper folders.

8 HR — employee documents

On the employee form you can **attach personnel documents** to keep the **complete staff file** in the system.

Typical documents	Purpose
CV / résumé	Career and skills
Employment contract	Terms of engagement
ID / Passport	Official identity
Diplomas / certificates	Qualifications
Other (letter, photo…)	Additional HR file items

8.2 How to attach documents

1. Open **Employees** → employee create/edit form.
2. In **Documents**, select one or more files.
3. Accepted formats: **PDF, DOC, DOCX, JPG, PNG**.
4. Save — documents stay linked (view / download / delete per rights).

> **Good practice**
> Name files clearly (e.g. Contract_Name_2026.pdf). Delete only with HR authorisation. Protect personal data confidentiality.

8 HR — salary advances & payroll

Menu **Payroll** › **Salary Advance**. An advance is paid out and recovered through payroll deductions.

Request → **Approval** → **Payment** → **Payroll deductions**

1. Create a **salary advance request**: employee, amount, reason, instalment schedule.
2. Validate / approve per HR workflow.
3. Payment may generate a **cash outflow request** (link to treasury / accounting).
4. On payroll, the **loan / advance deduction** is applied for the planned months.
5. Monitor the outstanding balance until fully settled.

> **Important rule**
> An employee **cannot** take a new advance while a previous debt is pending or partly paid. All instalments must be cleared first.

8.3 Leave & payslips

1. Record leave **before** running the month's payroll.
2. Check open advances (correct deductions on the payslip).
3. Generate Pay journal → Payslips; print / archive.
4. Consult contribution and tax journals for declarations.

9 Accounting module (English)

SOVAN uses **anglophone double-entry accounting**: every transaction posts balanced Debit and Credit lines.

Sub-menu	Role
Chart of Accounts	Account tree (assets, liabilities, equity, income, expenses)
Advance Payment	Cash advances / prepayments
Fund Transfer	Movements between cash and bank accounts
Expense Category / Expenses	Operating expense classification and posting
Cash Outflow Request	Payment request (supplier, salary advance, other)
Cash Outflow	Actual payment after request approval
Return Fund	Return of unused cash
Journal Entry	Manual entries and review of automatic postings
Accounts Balance (Trial Balance)	Debit / Credit balances of all accounts
Active / Passive Balance Sheet	Assets side / Equity & liabilities side
Account parameters	Default accounts (VAT, sales, purchases, FG, depreciation...)

9 Accounting — chart & treasury

9.1 Chart of Accounts

1. Open **Chart of Accounts** and review the hierarchy.
2. Each account has a code, name and type: **Asset, Liability, Equity, Income, Expense**.
3. Account parameters map operations (sales, stock, VAT, cash, bank) to the correct codes.
4. Do not rename or delete an account that already has movements without Finance approval.

9.2 Daily treasury

1. **Supplier payment**: after stock receipt → Cash Outflow Request → Cash Outflow (**cash or bank**).
2. **Fund transfer**: petty cash → main cash, or between bank accounts (voucher signed, two signatures).
3. **Sales collection**: on cash settlement of the invoice, choose cash or bank.
4. **Salary advance**: may create a cash outflow request linked to the employee.
5. Attach supporting documents; after approval check Debit = Credit.

9 Accounting — journal entries & posting

9.3 Journal Entry

1. Open **Journal Entry** to review postings from stock, sales, payroll and cash movements.
2. Manual entry (if authorised): date, narrative, debit and credit lines — totals must balance.
3. Never leave an unbalanced entry; reverse with a clear reason if needed.

Operation	Debit	Credit
Purchase receipt	Inventory / store (+ input VAT if applicable)	Accounts Payable
Supplier payment	Accounts Payable	Cash or Bank
Sales invoice (cash)	Cash or Bank (gross)	Sales revenue + output VAT
Sales invoice (credit)	Accounts Receivable	Sales revenue + output VAT
Collection of receivable	Cash or Bank	Accounts Receivable
DN / stock out (after invoice)	Cost of sales / item account	FG / merchandise store
Production Order	FG stock	RM consumption (as configured)
Salary advance paid	Staff advance / receivable	Cash or Bank
Advance recovered on payroll	Payroll / salary accounts	Staff advance (reduce balance)
Depreciation charge	Depreciation expense	Accumulated depreciation
Year-end — profit	Income summary / P&L	Retained earnings / reserves
Year-end — loss	Retained earnings	Income summary / P&L

Control
After each approval: Journal Entry (Debit = Credit) + cash/bank/AR/AP balances.

9 Accounting — depreciation

Fixed assets (mills, vehicles, buildings, production equipment) lose value over time. **Depreciation** recognises that expense each period.

Concept	Detail
Fixed asset / PPE	Long-term asset used in operations (e.g. mill, truck, building).
Cost	Acquisition cost (purchase + capitalised incidental costs if configured).
Useful life	Years (or months) over which cost is allocated.
Depreciation charge	Period expense: Debit Depreciation expense / Credit Accumulated depreciation.
Net book value (NBV)	Cost − Accumulated depreciation.

9.4 Practical steps

1. Register the fixed asset in the asset / account structure as configured.
2. Set useful life and method (straight-line is usual for training).
3. At period or year end, post the **depreciation charge**.
4. Check the charge on the **income statement (P&L)** and NBV on the **balance sheet**.

> **Note**
> Do not depreciate inventory (RM, FG, merchandise). Only fixed assets are depreciated. Inventory is valued at cost / production cost.

9 Accounting — year-end closing

Year-end closing closes one financial period and opens the next. Restricted to Finance / authorised administrators.

9.5 Closing checklist

1. **Physical inventory** of RM, materials, FG, merchandise — reconcile to the system.
2. **Bank reconciliation** and cash count (balances = reality).
3. Post **adjusting entries**: accruals, prepayments, provisions if required.
4. Post **depreciation charges** for the period.
5. Review **AR / AP** balances (customers and suppliers).
6. Print / export: **Trial balance**, **Income statement (P&L)**, **Balance sheet** (Active + Passive).
7. **Close the year**: income and expense accounts are closed; net profit or loss goes to retained earnings.
8. Open the new year: balance-sheet balances are brought forward as opening balances.

Report	Use
Accounts Balance (Trial Balance)	All accounts with Debit / Credit balances — first control before close.
Income statement (P&L)	Income − Expenses = profit or loss for the period.
Active Balance Sheet	Assets: inventory, receivables, cash/bank, fixed assets at NBV.
Passive Balance Sheet	Equity, payables, tax/social liabilities, other liabilities.

> **Security**
> Never close without written Finance approval. Take a backup before final closing. After close, do not alter closed-period movements without an authorised reopening procedure.

10 Approval workflow & reports

Created → Validated → Confirmed → Approved

Stock and accounting are impacted permanently only after **approval**. Stock reports: RM, materials, FG, merchandise.

11 Best practices and exercises

#	Rule
1	Respect Plan → Requisition → Transfer → Production Order.
2	Billing: Proforma → Sales Order → **Invoice** → **Delivery Note**; no invoice, no DN; Original / Copy + signatures.
3	Cash settlement: always select **cash or bank**.
4	HR: complete employee file (data + attached documents); no new advance if debt remains.
5	Payroll: leave and advance deductions checked before payslips.
6	Accounting: review journals; depreciation and year-end close = Finance only; backup before close.
7	Never share login credentials.

Exercises (SOVAN)

1. Create RM card “Maize” and FG item “Flour 25 kg” with bill of materials.
2. Purchase request for RM + order + receipt into Main RM stock.
3. Production plan + requisition + transfer of RM to the workshop.
4. Approve a Production Order and check flour stock (FG).
5. Create a proforma then an **invoice**; settle cash (bank); then create the **delivery note**; check the journal entry.
6. Create an employee, attach CV + contract (PDF), create a salary advance; open the pay journal.
7. Explain a depreciation charge and the year-end closing steps (trial balance, P&L, balance sheet).

Evaluation

Criterion	Excellent	Good	Average	Weak
Clarity of explanations				
Useful for my job				
Practical exercises				

Trainer: AMBAZA Marcellin
Managing Director, EGOTEK
